Java for Android ↗

Object Oriented Programming in Java ↗

Programming Foundations with JavaScript, HTML and CSS ↗

Web Development ↗

WORK EXPERIENCE

Java Full Stack Developer,
VKTechno Solutions Pvt. Ltd.
Jun 2023 – Nov 2023 | Indore,MP

Login & Registration

- Implemented login and registration functionality using React for the frontend, Spring Boot for the backend API, and H2DB as the database. Utilized Postman for API testing and validation. Developed secure authentication and authorization features to ensure a seamless and secure user experience.

RCL Project

- The SYSTEM ADMIN project is a software system for RCL Company that made for company administrators. It has eight screens that help admins manage different tasks. This project is like a control center for admins. It has a user-friendly design that makes it easy to use and helps admins get their work done faster, Currently, I am focused on developing a single screen out of the eight screens in the SYSTEM ADMIN project. Specifically, I am working on implementing to improve the user experience to save their data securely

PROJECTS

Binge Watcher, Website ↗
Oct 2022 – Jan 2023

- Developed with React.JS, CSS, and API integration, it offers a vast collection of shows complete with ratings, descriptions, and exciting trailers. Seamlessly search and discover your favorite series and anime, all in one place.
